

Water Cooling Portable Air Cooler

Voltage	Power (W)	Water Consumption	Water Tank	Air Volume (m³/h)	Applicable Area (m²)	Weight (KG)	External Dimensions (CM)
220V/50HZ	290	6-8L/H	60L	7200	50-70	35	89*49*140

1. High quality silicon steel, pure copper motor

Strong cool wind, large cooling capacity fast cooling, to meet the home/commercial/industrial in one of the cold wind king, new high speed, silicon steel pure copper motor, high performance, low energy consumption, strong power, so that the cold wind blowing farther, wider range, 12000h+ hours uninterrupted operation.

2. 35L large water tank

The large-capacity water tank is equivalent to 63 bottles of mineral water capacity (550ml/ bottle), which is convenient to add water and bid farewell to frequent water injection.

3. New engineering grade ABS material

The high-quality water curtain made of environmental protection composite material can achieve large area air cooling, filtration and purification, and the water absorption is 2.2 times that of ordinary wet curtains, each of which is certified by the national 3C.
